**Subject:** microsoft settlement

To: Renata B. Hesse, Antitrust Division

Dear Renata,

I object to the current settlement that Microsoft is offering. They are promising to open up their operating system to all and at the same time promising to specialize in security. Their security measures will force every software developer to use their "secure" applications which creates another monopolistic situation.

Please reject the current offering in favor of a truly workable solution, ie. dismemberment or restrict Microsoft's available markets.

Thank you,  
Kevin Boyle  
Systems Engineer
